WEATHER OF CONCERN

NORTHERN CALIFORNIA

- The combination of above normal temperatures and rapid snowmelt over the higher elevations of the Sierra will accelerate runoff and generate diurnal water rises on area streams and rivers during the next few days.
- Many rivers in the foothills and higher elevations of the Sierra could rise to near bankful this weekend.

SOUTHERN CALIFORNIA

- Slightly cooler each day through Sunday, as the deserts remain hot.
- For Monday, a low pressure system will move inland, bringing greater cooling, stronger and gusty west winds over the mountains and deserts, and a chance for showers. Even isolated thunderstorms are a possibility.

WEATHER KEY POINTS

04/25/19 - 05/01/19

Thursday-Saturday

- Warm conditions over the next few days will continue melting of snowpack and lead to rises in rivers and streams. No significant flooding impacts are expected at this time.
 - Much of the state will have low risk for heat impacts for those populations extremely sensitive to heat, especially those without effective cooling and/or adequate hydration.
 - Moderate risk for heat impacts for those who are sensitive to heat in the Inland Region and deserts of Southern Region.
- Isolated thunderstorm potential over mountains across the state, especially in the Sierra.

Sunday-Tuesday

- Next significant chance for showers and thunderstorms will be Sunday through Tuesday.
 - Rainfall chances currently look highest across the southern half of the state.
 - This storm could also be accompanied by gusty winds, especially in Southern Region.
- By Sunday and into early next week, a cooling trend will lead to significantly fewer impacts due to heat.

Wednesday

- Warmer and drier weather currently looks to return for the middle of next week
